WORK EXPERIENCE

Software Developer (Contract) October 2024 – October 2024

Energy Talent AI, Abuja, Nigeria

- Implemented an infinite marquee of team images in the hero section, creating a dynamic, continuously scrolling effect to capture user attention and showcase talent diversity, contributing to a professional first impression.
- Developed breakpoints and flexible grid layouts using Tailwind CSS, ensuring a consistent and engaging user experience across a wide range of devices.

Co-founder, Software Developer August 2024 – January 2025

NeTuArk, West Bengal, India

- Optimized the Chat Room feature by addressing bugs and enhancing functionality, significantly improving real-time engagement and conversation speed.
- Utilized Firebase Firestore to store chat data, enabling dynamic data updates and seamless user interactions.
- Enhanced the Feeds platform by managing replies to posts, resolving issues, and improving performance, enabling students to connect more efficiently.

Software Developer (Volunteer) September 2024 – Present

Church Project- Lagos, Nigeria

- Collaborated with the Project Manager in frequent video meetings to plan and implement the frontend architecture.
- Developed frontend components, including the Pastors, Parish, and Members components.
- Worked closely with the Backend Engineer, using Postman to ensure smooth API integration.

Software Developer (Contract) July 2024 – September 2024

Grand Coast Hotels, Ondo, Nigeria

- Contributed to the website launch, increasing online visibility and engagement by 25% through SEO optimization and performance enhancements.
- Optimized mobile responsiveness, ensuring seamless access for users on mobile and tablet devices.
- Streamlined the user experience with intuitive navigation, efficient page loading, and easy-to-read product details.

EXTRACURRICULAR ACTIVITIES

Software Developer (Personal Project) February 2025 – March 2025 **Restaurant Web App**

- Developed a restaurant app with account creation, authentication, and login using React Hook Form and Firebase.
- Implemented React Toastify for notifications and Redux for cart management.
- Ensured smooth navigation with React Router, focusing on user interactivity and a simple, intuitive experience.

Software Developer (Techbridge Capstone Project) September 2024 –December 2024

- Led a team of five developers in building an Instagram Feed Clone using React.js, RESTful API, and CSS.
- Assigned tasks, organized frequent meetings, and ensured equal contributions from all team members.
- Integrated real-time data fetching, optimized UI responsiveness, and ensured a seamless user experience

Software Developer (Techbridge project) November 2024

Getajob Landing Page

- Developed a visually appealing webpage with precise font sizes, styles, and colors, leveraging margins, widths, and transitions for subtle interactivity.
- Developed reusable and scalable React functional components, optimizing performance with hooks and a mobile-first approach for responsiveness.
