THOMPSON EREGHA DUERIMINI

thompsoneregha00@gmail.com | thompsoneregha.netlify.app

SKILLS

- Understanding of HTML, CSS and JavaScript frameworks such as Tailwind CSS, Jsx, Reactjs, JQuery.
- Experience with Microsoft development technologies including visual studio code, visual studio, .NET framework.
- Developing JavaScript code that is reusable, efficient, and scalable.
- Ensuring web applications are tested and updated for compatibility across different browsers.
- Strong ability to work independently while still being collaborative and inclusive

EXPERIENCE

- Created a user-friendly and responsive landing page for a cryptocurrency company using HTML and CSS, and utilized JavaScript to implement the navigation bar display feature for mobile users based off a Figma design.

- Developed a solution to a challenge on front end mentor while making use of tailwind CSS to develop the unique frontend style and JavaScript to implement the add-to-cart feature and also delete from cart when required.

- Implemented a sign up and login feature that makes use of google authentication, email and password on firebase as a backend service, which also includes email verification feature that helps keep user logged in. The email verification status is updated using tailwind CSS, which also provides a responsive display on mobile and tablets.

- Created an e-commerce page for ANKRA clothing based on a Figma design, utilizing HTML and CSS to ensure pixel-perfect accuracy and responsiveness for both tablet and mobile users. Implemented JavaScript to develop a sidebar navigation feature for mobile users and a user creation feature.

- Comfortable with version control systems and other local web development workflows and tools such as GitHub to manage project changes, package managers (npm, yarn), API integration, deployment and testing.

- Experience with webpage optimization and SEO services which includes performance optimization, Technical SEO, Analytics and reporting.
